**DUNKELBERGER ENGINEERING MAKES THE 2007 HOT FIRM LIST OF
FASTEST GROWING A/E FIRMS**

WEST PALM BEACH, Fla... Dunkelberger Engineering and Testing, Inc. (Dunkelberger) is pleased to announce the firm was ranked among the 200 fastest growing architecture, engineering, and environmental consulting firms by ZweigWhite Information Services, a management consulting and research firm, for its annual ranking, *The Zweig Letter* Hot Firm List. The annual list features professional design and environmental firms that have demonstrated consistent growth and success at outperforming the economy and competitors to become industry leaders.

Dunkelberger earned the 97th spot on the 2007 List and earned firm size and type status as one of the Top 3 geotechnical firms nationwide. *The Zweig Letter* Hot Firm Celebration and Conference, held recently in Boston, Massachusetts, recognized Dunkelberger and this year's honorees at a special reception.

"It's quite an honor, particularly the Top 3 geotechnical firm ranking at the national level," stated President Douglas S. Dunkelberger, P.E.

The Hot Firm List is based solely on gross revenue, verified by income tax returns or financial statements reviewed by third parties, for both the 2003 and 2006 fiscal years. Eligible firms, based in the United States and Canada, were required to be in business as of January 1, 2003 with revenue of \$1 million or greater in 2003.

Page Two/DUNKELBERGER MAKES HOT LIST

Firms were ranked based on percentage growth and dollar growth, which were weighted equally to give both small and large firms an opportunity to make The Hot Firm List. Each firm's two rankings were added together and the 200 firms with the lowest combined rankings comprise the list.

The November 26th issue of *The Zweig Letter* will feature a complete list of the 200 fastest growing consulting firms. The list can also be downloaded for free at <http://www.thezweigletter.com>.

Founded in 1994 by Douglas S. Dunkelberger, P.E., Dunkelberger Engineering is a full-service, professional engineering firm specializing in geotechnical services. With a staff of 130 and five office locations (Fort Lauderdale, Lakeland, Port St. Lucie, Sarasota, and West Palm Beach), the firm's clientele includes both public and private entities. Dunkelberger offices include CMEC certified and ACOE validated laboratories.
